TEKA  
BROCHURE  
2023

The TeKa logo consists of a white circle above a horizontal line, with the word "TeKa" in a white, lowercase, sans-serif font below the line.

## About Teka

Teka is a European industrial group founded in Germany in 1924. With over 90 years of experience, Teka is a leading white goods manufacturer and one of the most important groups in the world in the production of stainless steel sinks and taps.

## Built-in peace of mind with Teka

From our own manufacturing facilities we can produce high quality products and we want you to be confident when buying Teka.

Therefore, all our ovens, compacts, microwaves, combination microwaves, steam ovens, coffee machines, warming drawers, hobs and hoods are available with an extended 5 year parts and labour warranty. (Other appliances are available with a standard 2 years cover).

## Teka HydroClean®

### The real Eco-cleaning solution

Teka makes our consumers' dreams come true thanks to its Hydroclean® system: Keeping the oven clean using only the power of water.

#### Hydroclean® PRO

The Hydroclean PRO system allows you to programme the cleaning function and turn it on by just pressing a button. One touch, one function. As easy as pie!

The combined action of the steam generated inside the oven cavity and the Hydroclean technology removes stubborn grease and dirt with just a glass of water and minimum effort in only 24 minutes.

All Turboair cooker hoods carry a full 2 years parts and labour guarantee.

Turboair is an Italian brand with a long industrial tradition in the manufacturing of cooker hoods.

Founded over 35 years ago in the Fabriano area, famous for its production of domestic appliances, Turboair is a brand that belongs to the Elica Group, world leader in the field of cooker hoods.

Robustness, the painstaking selection of materials employed and reliability are the features of products that are built to last, together with the tradition and beauty that make Italian style so recognisable. Integral design, both classic and functional for ease of use, with interface controls for lighting and airflow employing simple buttons or electronic controls. Airflow efficiency, with high-tech motorisation and respect for the environment. Products that are easy to clean and even easier to admire, bringing warm lighting to the day's cooking and a traditional family atmosphere to the kitchen. Turboair is an example of Italian excellence, exporting millions of products to homes all over the world. Their cooker hoods, the perfect combination of simplicity, tradition, and solidity, offer you the serenity of a choice that will last a lifetime.
